

DYNAMIC ANALYSES

□ **simple construction algorithm**

-> *nodes* - *system states*

-> *arcs* - *the (single) firing transition*

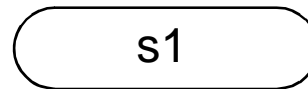

-> *single step firing rule*

□ simple construction algorithm

-> nodes - system states

-> arcs - the (single) firing transition

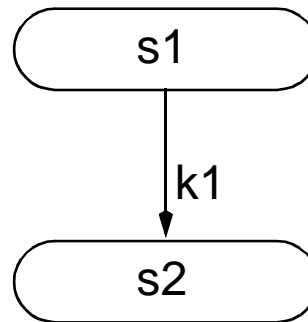

-> single step firing rule

□ simple construction algorithm

- > nodes - system states
- > arcs - the (single) firing transition

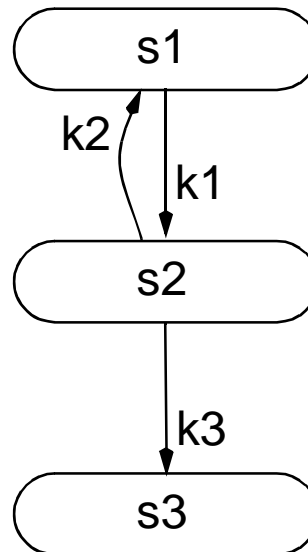

-> single step firing rule

□ simple construction algorithm

- > nodes - system states
- > arcs - the (single) firing transition

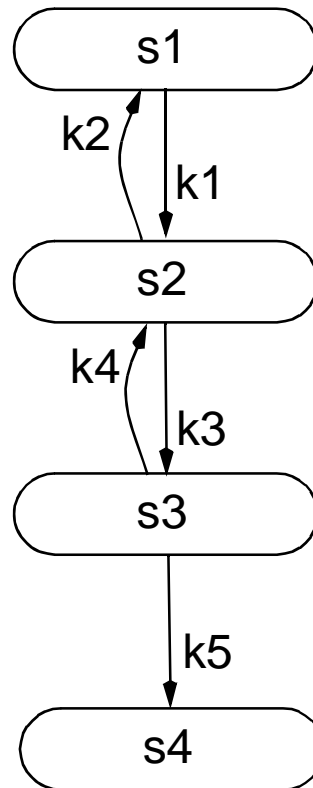

-> single step firing rule

□ simple construction algorithm

- > nodes - system states
- > arcs - the (single) firing transition

-> single step firing rule
